

Sprint Airave SCS-26UC2 Teardown

Teardown of the Samsung Airave for Sprint.

Written By: Erik Leonard

INTRODUCTION

This guide will walk you through the steps to completely disassemble a Sprint Airave.

TOOLS:

- [iFixit Opening Tools](#) (1)
 - [Phillips #00 Screwdriver](#) (1)
 - [Socket 8mm](#) (1)
-

Step 1 — Sprint Airave SCS-26UC2 Teardown

- Remove the external antenna, GPS cover, and GPS module.

Step 2

- Use a pry tool to remove the white outer cover. Pry towards the front of the device. Continue prying down the length of the cover until it pops off.

Step 3

- Locate and remove the four Phillips screws

Step 4

- With the cover removed you now have access to the circuit board.

Step 5

- Using an 8mm socket you can remove the antenna pigtail.

Step 6

- Release the clip indicate to remove the circuit board.

Step 7

- Here is the circuit board fully removed.

To reassemble your device, follow these instructions in reverse order.
